## Precautions For Each Planet - Venus

By

Anita Khandpur, India

**L**al Kitab (Red Book) is a common name heard by many people across India. The remedies given in Lal Kitab are very simple and require very little time and they are inexpensive. There are many books available in the market by many authors and all of them have nearly the same remedies. What is more important to learn is what to avoid in life. This has been my personal experience as a professional astrologer in Mumbai, dealing with various category of charts & what it has been observed by this scribe is that it is not the remedies one does to solve ones problems that an astrologer needs to tell his clients but what the client should *never land up doing* on his own which will cause his downfall, this is what the astrologer must warn his clients. This would be a 9 part series which I have culled out from Lal Kitab and one rare old Gujarati Book, which I have observed to work very well in my experience over decades.

**Chart 1:** Female: 04 February 1963. 02:49:00. Mumbai.

This is a chart of a female who has Venus in 2H with Mercury in Dhanu rashi. This female does lots of charity of ghee, rice in various temples. Her husband is involved in an extra marital affair for more than ten years now. She does not try to maintain herself properly (using perfumes, deodorants, ironed clothes). Her husband was back with her since past one year, but again her habit of doing charity of Venus related items spoiled her marital life.

**Chart 2:** Female; 22 June 1960. 04:30:00. Aurangabad/Maharashtra.

This female is not married still. She was advised at a very young age not to wear used clothes, but whenever her relatives gave her their old clothes she would not refuse. She never uses perfumes and never makes efforts to take care of own self. She moves in uncolored hair most of the time, never bothers to iron clothes though she can afford all.

Both have exalted moon.
